## Inter-Organizational Collaboration

### In-Vivo Simulation of Shared Decision Making

2009 – 2011, DRDC, TIF, \$400 000

Research Using in Vivo Simulation of Meta-Organizational Shared Decision Making (SDM), is one component of the Technology Innovation Fund (TIF) project that has been designed to assist in understanding the inter-organizational collaboration challenges faced by the Canadian Forces (CF). The objective of the stream is to conduct basic research into shared decision making through the analysis of case studies, exercises and simulations.
